# WEATHER OF CONCERN

## Weather of Concern

### **Northern California**

- A Freeze Warning has been issued for Northeastern Mendocino Interior.
  - In effect on 10/30/18, Tuesday, from 0100 to 0900 hours.
- Critical fire weather conditions tonight through Wednesday morning for portions of Interior Northern California.
  - High pressure building inland will bring gusty north to east wind over portions of Interior Northern California tonight through Wednesday morning.
  - These winds will significantly lower humidity and fuel moistures leading to critical fire weather conditions.

### **Southern California**

- Gusty Santa Ana winds will return to Southwest California Tuesday night into Wednesday.
  - The strongest winds will be focused across eastern Ventura and western Los Angeles counties Tuesday night into Wednesday morning, with wind gusts ranging between 35 and 45 mph in wind prone areas.
  - The Santa Ana winds will bring warming and drying to the watch area, with widespread humidities between 8 and 20 percent, along with temperatures climbing well into the 80s across lower elevations.
  - Coastal areas of Los Angeles and Ventura counties will see elevated fire weather conditions, and perhaps a few hours of critical conditions.

### **Weather Advisories, Watches, and Warnings currently active in California:**

### **Active Weather Warnings, Watches and Advisories by County:**

- <http://www.wrh.noaa.gov/hazardSummary/?state=ca&bycounty=1>

# Key Points

## Moderate Offshore Wind Event Tonight-Early Wednesday

- Not as strong or as long-lasting as the mid-October 2018 offshore wind event
  - Northeast winds 20-30 mph with gusts as high as 55 mph
  - Humidity values as low as 9-15% Tuesday with little nighttime recovery
- Strongest winds expected to be near the intersection of the Lake, Napa and Yolo County lines
  - Timing of peak wind gust speeds appears to be focused on Tuesday morning, and then again late Tuesday night into very early Wednesday

# WEATHER SYNOPSIS BY REGION

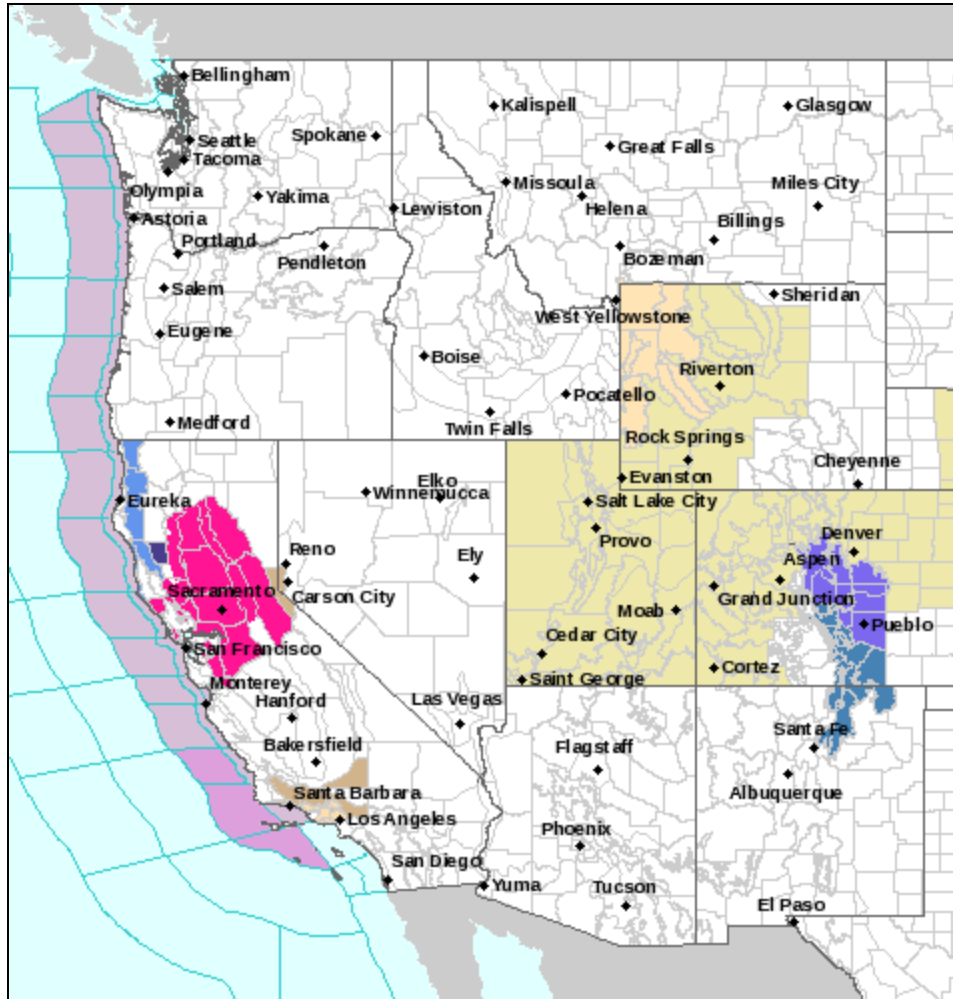

## **NORTHERN CALIFORNIA**

- High Risk through Thursday morning for Strong N-NE Wind and Low Relative Humidity (RH) Western Cascade-Sierra Slopes, Sacramento Valley, SE portions of Mid Coast-Mendocino and Diablo-Santa Cruz Mtns
- High pressure ridge will be dominant next 7 days with weak weather systems working their way around the ridge.
- NW-N winds (gusts 20-25 mph) today before turning N-NE (gusts 25-35 mph) tonight and lasting through Wednesday morning.
- Another pulse of N-NE (gusts 20-30 mph) wind Wednesday night favoring the Sacramento Vly, lesser winds thereafter.
- Lowering humidity with a return to teens/20s Sacramento Vly and higher ridgelines.
- Warming with above normal readings latter half of the week into the weekend.
- A few light showers far north/northwest possible next 7 days, otherwise dry conditions.

## **SOUTHERN CALIFORNIA**

- A trough will move through the Pacific Northwest and will be in the Northern Rockies on Tuesday. This will usher in a cooling trend across the region with daytime highs dropping to near normal levels for the start of the new work week.
- Highs in the mid-60s to mid-70s mountains, 70s to low-80s valleys, and in the mid-80s over the eastern deserts through Tuesday. Warmer during the latter half of the week.
- Gusty northwest to northeast winds of 15-25 mph across the mountains of Santa Barbara, Ventura, and Los Angeles Counties as well as over the Tehachapi Range this evening and overnight.
- Local north to northeast winds developing along and west of the coastal ranges south of Point Conception Tuesday, peaking in strength on Wednesday with speeds in the 15-25 mph range.
- Relative humidity values dropping into the teens over much of the region by mid-week.
- No precipitation is expected the next 2 weeks.
